SECTION 162-20. CERTIFICATE OF COMPLETION

Upon the completion of the installation of the electrical wiring devices and equipment, it shall be the duty of the person or firm, or corporation installing the same to notify the Building Inspector, who shall inspect or cause to be inspected the installation promptly after such notice is given. If it is found to be fully in compliance with the provisions of this Code, he shall endorse or countersign the certificate issued by an Authorized Underwriter Agency and issue to such person, firm or corporation a certificate of completion as a final approval authorizing connection to the electrical service and the turning on of the current use of the installation and shall send written notice of such authorization to the public utility corporation furnishing the electrical service. When a certificate is issued authorizing the connection and use of temporary work, such a certificate shall be issued by the Building Inspector at his discretion. A preliminary certificate may be issued authorizing the connection and use of certain specific portions of any uncompleted installation. Such a preliminary certificate shall be revoked at the discretion of the Building Inspector. If upon installation, the installation is not found to be fully in compliance with the code, the Building Inspector shall at once forward the person, or corporation installing the wiring a written notice stating the defects which have been found to exist.
